

Nano- and Micro-Scale Porous Polymer-Based Systems

- *Synthesis:* colloidal assembly, porogen pyrolysis, block copolymers.....
- *Applications:* low- k dielectrics, drug delivery, tissue engineering, membranes, patterning, absorbents.....
- *Characterization:* porosimetry, ellipsometry, NMR, XRR, SAXS, microscopy, SANS, PALS.....

Michael S. Silverstein – Technion: michaels@tx.technion.ac.il

Neil R. Cameron – U. Durham: n.r.cameron@durham.ac.uk

Bradley F. Chmelka – UCSB: bradc@engineering.ucsb.edu

**Deadline:
April 2!**

Confirmed Speakers: Markus Antonietti, MPI; Michael Baklanov, IMEC; Barry Bauer, NIST; Andrew Cooper, U. Liverpool; Benny Freeman, U. Texas; Marc Hillmyer, U. Minnesota; Steve Howdle, U. Nottingham; Brian Landes, Dow Chemical; Neil McKeown, U. Cardiff; Robert Miller, IBM; Tomas Russell, U. Massachusetts; David Sherrington, U. Strathclyde; Molly Shoichet, U. Toronto; Edwin Thomas, MIT.

PMSE Division, ACS National Meeting, Boston, August 19-23, 2007
